

## **MAGE SOLAR Launches Innovative PV-Mounting System Reducing Install Time By About 30%**

**MAGE SOLAR introduces simple and easy installation system with highest quality components plus long material warranty**

**Dublin (Georgia), October 11, 2011.**—MAGE SOLAR USA, part of the globally operating MAGE GROUP, announces the introduction of its newly developed and highly innovative mounting system, MAGE SYSTEMTEC.

MAGE SYSTEMTEC was engineered considering demands and challenges for integrators when working with mounting systems and parts under real life conditions. Upholding highest quality standards, MAGE SOLAR has created a universally adaptable, easy to use mounting system that reduces installation time by about 30% over conventional systems. MAGE SYSTEMTEC is designed to provide flexible, customized solutions with strong results on a wide array of pitched roofing situations, including asphalt shingles, roof tile or metal roofs.

Since the easy-to-use slide-and-snap connectors and clamps require only a few tools, a speedy assembly process will cut down installation costs for customers and further accelerate the clients' return on investment at the same time. Although MAGE SYSTEMTEC is a truly an all-rounder when it comes to utilization and simplicity, it entirely possesses the quality MAGE SOLAR customers can expect. Made with the most durable components, MAGE SYSTEMTEC is accompanied by a 10-year material warranty.

"MAGE SYSTEMTEC is a mounting system that comes from a company with a strong and successful background in PV systems and a focus on complete system solutions. We know what integrators need and which demands and expectations they have of a perfect mounting system. MAGE SYSTEMTEC is easy, quick, and adaptable to many roofing situations installers face daily, yet this highly durable and intelligently designed," says Joe Thomas, President and CEO of MAGE SOLAR USA.

With an experienced engineering department on staff, MAGE SOLAR also provides complete design assistance to integrators implementing MAGE SYSTEMTEC. Based on a host of data from local codes and regulations to weather records and more, MAGE SOLAR prepares solid customized solutions for any clients' needs.
